Ergoslider Plus+
Ergonomic Pointing Device

by Kondator

Ergoslider Plus+ available in silver and black version.

...it's kind of magic!

Worldclass Ergonomics!

Ergoslider™ has an extremely low, elegant design. This is to give the user absolute comfort, for a preventive, natural position without tension during daily work with the computer.

All button functions are centred on the manoeuvre panel for access and natural tactility on the keyboard. The comfortably soft removable wrist support, gives a nice rest for the wrist and can be supplemented, when necessary with a larger and deeper support for increased comfort.

The uniquely removable roller bar on the Ergoslider™, allows simple dirt and fluids maintenance providing long-term and problem-free operation. Ergoslider™ is easy to install (plug & play), and fulfills most user's needs with it 5-button functionality and roller bar.

Tailor-made Arm Support
Is adapted for deep dock in forearm support, giving shortened distance to the keyboard for increased comfort.

Extra Wrist Support, Ergoslider Extended.
Dimensions: 480 x 148 x 30 mm

Ultra slimmed (only 23 mm) design for optimal ergonomic.

Ergoslider™
